Data and analytics on BigQuery

One reporting layer for sales, stock and online data, with dashboards managers actually use.

Brochure, October 2026. For clients and prospects.

What's included

- **Reporting foundation.** Sales, stock and online data in one BigQuery dataset.
- **Store-level sales dashboard.** Daily sales by store and category, refreshed before trading opens.
- **Data pipelines.** Scheduled loads from tills, the online shop and spreadsheets.
- **Manager training.** Hands-on sessions so managers can answer their own questions.
- **Stock alerts.** Daily low-stock alerts by store, emailed to each store manager before opening.

Not included

We don't build mobile apps. We connect your reports to the apps your teams already use.

Prices

New prices apply from 1 November 2026. Prices exclude SST.

Item	Price
Reporting foundation	On quote
Dashboard build	RM 3,200 per dashboard
Training session	RM 1,800 / session
Data quality check (one-time)	RM 3,500

Results

> **Same-day reporting for a 30-store retailer.**
> Weekly reporting that took three days now lands the same morning.

> **A 12-outlet bakery chain cut stock write-offs by 18% in six months.**
> Stock alerts and a waste dashboard for every outlet.
